

- **What is time-lapse photography?**

Taking photos at specific intervals and then combining them into a movie will give you a time-lapse movie that looks like a fast-moving movie. Traditionally, you need to shoot the photos one by one and combine them into a movie on computer. The threshold is quite high and takes you so much effort, but Afidus condenses all the work in one time-lapse camera, from shooting to film generation all with just one button.

- **What could I do if I forgot Afidus camera Wi-Fi password, could I reset the password?**

step 1: Remove every power source(battery and plug input), and remove SD card
step 2: Press power button(hold), and plug in USB power input(external power input)
step 3: Release power button after hearing(short beep*2 long beep*1)
step 4: Searching Afidus camera in phone Wi-Fi list, connect it with factory default password

- **Can I use power adapter?**

Yes, by using micro USB cable in accessories + DC 5V1A adapter.

- **PIR sensor triggering**

PIR triggered by heat source like human or animals, a bag doesn't trigger PIR, every triggering drives 5 seconds continuous recording.

*Trigger distance: < 5 meters in fan angle

*PIR requires 1 min to warm up

- **How to access video without moving the camera or removing SD card?**

Access video by using micro USB cable to link with your computer.

- **How to make a stop motion animation?**

You can make stop motion animation by combining snap shot in photo gallery(magic wand).

- **Can I preview the time lapse video in smart device?**

Just click the preview photo in the gallery.

- **How to update camera firmware?**

Tap "Firmware" in homepage, select "download firmware" then tap firmware update in setting page.

- **Supported memory card?**

Support SDXC & SDHC mSD card, Sandisk recommended, 32GB is enough for all condition.

- **How can I know camera is running out of power?**

The Red LED indicator flash every 10 seconds if running out of power.

- **Android phone can not link to ATL-200 WIFI.**

Some Android phone have to turn into flight mode to enable ATL-200 WIFI connection.

- **How to use ATL-200 exclusive Image Alignment feature?**

Please visit Afidus official YouTube channel for detail.

- **It's difficult to remove battery case.**

Using battery case remover included in the box, visit Afidus official YouTube channel for how to use.

- **Lot of scratching on the lens, it might be a defective or used camera?**

Please remove the protective film on the lens.

- **Why the image in viewfinder is all pink/purple?**

Reconnect power supply(Battery or mUSB cable) and reboot camera again.
